

AGAT Laboratories

Vancouver Laboratory Expansion

AGAT Laboratories is proud to announce the expansion of its Environmental and Mining facilities in Vancouver, British Columbia. Our new laboratory will house the most modern and state of the art technology available in the laboratory industry. The development of this laboratory strengthens our Western Canadian presence and augments our geographical diversity across Canada.

Burnaby, British Columbia

The significant size of this laboratory, supplemented by our network of Environmental and Mining laboratories in Northern and Southern Alberta, will support large volumes of work at expedited turn-around times. The Vancouver laboratory will be a full service laboratory, and will operate as a sample reception and bottle pick-up location for all of our scientific divisions which include Environment, Ultra Trace, Agriculture, Air Quality Monitoring, Food Analysis, Mining Geochemistry, Tribology, Oil and Gas Chemistry, Oilsands, Geology and Petrology, Routine Core, and Reservoir Engineering.
