

AGAT Laboratories

Whitehorse Laboratory Opening

AGAT Laboratories is proud to announce the opening of its newest laboratory in Whitehorse, Yukon. This facility will house a full sample reception and preparation facility for AGAT Laboratories' Mining Geochemistry Division. With an area of over 6,000 square feet, this facility will also serve as a sample reception and bottle pick-up branch for all of AGAT Laboratories' scientific divisions which include Mining Geochemistry, Environmental, Agriculture, Food Analysis, Ultra Trace, Oilsands, Geology and Petrology, Oil and Gas Chemistry, Tribology, Air Quality Monitoring, Reservoir Engineering, and Routine Core.

As Canada's only full service, nationwide laboratory, AGAT Laboratories' continued growth offers our clients a unique enhanced business relationship by providing them the opportunity to consolidate multi-divisional analytical service requirements with one laboratory vendor. The addition of this facility, together with our expansions in Vancouver, British Columbia and Edmonton, Alberta, show AGAT Laboratories' long term commitment across Canada as we further expand our service offerings.
